Release Notes - Version 2.0

What's new in the GrainFlow X50 version 2.0.

Introduction

We are pleased to announce the release of GrainFlow X50 version 2.0. This release includes significant improvements in performance, safety, and connectivity.

Release Date: 2026-03-15

Document Version: 2.0

New Features

- **Remote Monitoring:** Connect to the GrainFlow X50 via IoT to monitor performance remotely.
- **Energy Efficiency Mode:** Reduces power consumption by 15% during low-load operation.
- **Self-Calibrating Sensors:** New sensor technology automatically adjusts for ambient conditions.
- **Multi-Language Interface:** HMI now supports 8 languages.

Advanced Model Exclusive Features

- **Predictive Maintenance:** AI-driven alerts for potential failures.
- **Advanced Analytics:** Detailed performance dashboards and reports.

Improvements

- **Efficiency:** 15% improvement in energy efficiency
- **Reliability:** New bearing design increases lifespan by 25%
- **Safety:** Enhanced emergency stop system

Bug Fixes

- Fixed issue with sensor calibration at startup

- Resolved communication error with HMI
- Improved vibration detection accuracy

Known Issues

- When using high throughput (>70 TPH), slight vibration may occur. This is being addressed for v2.1.
